

I am writing to urge the Ketchum City Council to support The Climate Action Coalition Petition to commit to reaching 100% clean energy by 2045.

If any town needs to be aware of the dangers of climate change, it should be Ketchum. Fires, drought, low snow packs, and insect infestations are stressing our beautiful Valley. To support this issue is to support the economy of this area.

As shown in the film Saving Snow, other ski towns AND the sports industry have committed to paving the way towards a clean energy future .....to insure THEIR futures. It's time for us to join that effort.

It's time for you to step up and commit to this challenge. It's time for you to be the leaders we need to make the transition to a clean, sustainable environment.

Be Brave!  
Mary Malkimus
