Dear Ketchum,

I would love to see the City of Ketchum take up a Project to 'Beautify the City' by removing the ugly Telephone wires that obstruct and kill our views of the magnificent mountains all around us!

It just doesn't make sense that we have all this beauty around us, the gorgeous mountain views, and we have Telephone wires and poles in all the views and pictures? You drive down the street and look up to the mountain and the first thing you see is WIRES! It's really a shame!

Why is this, and why is nothing being done to start this effort?

I would love to see this taken up and some type of plan developed to start moving the lines under ground.

Thank you,

Bob Matsey
