Subject: PEG Project

I'm not sure if you were copied on my email or if it matters at all. In all of the communication I've seen over the past two years, there is a 95% to 5% majority not supporting the waivers all of you have approved. Can someone tell me if these letters are being read?

Please go visit the Onyx project completed last year and look at the impact to Trail Creek Crossings. It's like the Queen Mary on stilts looking down at our building. We all paid premium prices to buy here and the developer adhered to the code at Trail Creek.

I'm not sure if Onyx exceeded the height outlined on their plans, but we will find out. There really needs to be an end to this oversight by elected officials and possible corruption. Are any of you bothered by the email exchange between PEG, the Mayor and City Planner months before the property was bought discussing waivers?
