Subject: 4th street closing

There might be another alternative to the total closure of 4th street: Consider the impact of making it a PEDESTRAIN RIGHT OF WAY. Automobiles allowed, that would keep the several precious parking spots in place as well as access to the alley between the Leadville and East Street shops accessible from both ends. Bicycles could be required to be “walked” for safety. This type of regulation has worked very nicely in SEATTLE’S PIKE PLACE MARKET area for decades to the satisfaction of all users. There may be other places in our “core” which might also thrive with this multi user scheme. JIM PLOMASEN 208 720 4562.
