Northwood Well Pumphouse Standby Power Modifications

Blaine County, Idaho

Addendum

June 16, 2023

As the property in which the generator is proposed to be placed upon contains floodplain, a *Floodplain Development Permit* is required to be submitted by the contractor and approved prior to placement of the generator. The proposed location of the generator is not within the floodplain. The contractor would be responsible for obtaining the *Floodplain Development Permit*. The required materials for the *Floodplain Development Permit* would be a site plan indicating the distance between the generator and the river channel.
